

Professional Readiness for Innovation, Employability and Entrepreneurship

Assignment-2

Python code for Temperature and Humidity

Coding:

```
temperature=85
humidity=90
if temperature>=80:
    if humidity>=90:
        print("Its hot and humid")
        print('Buzzer on')
    else:
        print("Its hot but not humid")
else:
    print("Its not humid")
```

Output:

```
Its hot and humid
Buzzer on
```
