

PROJECT TITLE: REAL TIME RIVER WATER QUALITY MONITORING USING IOT.

TEAM ID: PNT2022TMID34542

<p>1.Customer segment(s) Who is customer? The people who need pure and hygienic water for their daily usage are our customer.</p>	<p>6.Customer. Constraints like Water purity and analyse the quality. People understand the importance of water resources.</p>	<p>5.Available Solution. The main solution of our project is to analyse the water quality. Don't mix the chemicals in water resources.</p>
<p>2.Jobs to-be done /Problems. In this modern world, the drinking water is turned into poison. By using our project, we identify and analyse the quality of water.</p>	<p>9.Problem root cause. If large amount of chemicals mixes with water algae formed and purity and vitamin in the water are decayed. Many unknowable diseases formed.</p>	<p>7.Behaviour The main Behaviour of this Project is helps people to understand the Eminence of water and models provide Decision in order to properly mitigate water.</p>
<p>3.Triggerstr What triggerstr customer to act? The impurity of water is like a poison it give viral disease and health problems. The main aim of our project is not only analyse the impurity but also some social message like don't pollute the water resources.</p>	<p>10.Our Solution. Don't dump the Waste and reduce the chemicals mixed in water resources. Avoid build a factory near water resources. By our project we not only identify the water quality but also give some social message to All living organisms to live a healthy and hygienic life</p>	<p>8.Channels-of-Behaviours. 8.1 ONLINE Our project not need the online process. Because we done this project in the offline mode operations. So, it is an easy and simple process to work.</p>
<p>4.Emotions: Before/After EM How do customer feel when they face a problem or job and</p>		<p>8.2 OFFLINE The turbidity sensor placed inside the water and analyse the quality of water. Then</p>

<p>afterwards?</p> <p>People(customers) understand the purification of water. Pure life gives healthy. Our customer are very happy because water is essential for all living organisms.</p>		<p>the LED display provide the amount of impurity present in water</p>
